Albania Kosovo, Large-scale renewable energy project in Albania and Kosovo with 105 MW photovoltaic and 99.5 MW battery storage for sale

This large-scale renewable energy project includes the installation of 105 MW of photovoltaic systems to generate electricity and 99.5 MW of battery storage to efficiently store the generated energy and ensure a continuous supply. The combination of these two technologies ensures a sustainable and stable energy supply, both in Albania and Kosovo.

Two attractive pricing options offer investors flexibility:

Ready to Build (RTB): The project is ready for immediate implementation, all permits have been granted and the land has been developed.

Turnkey: The project is fully realized and ready for operation upon handover, enabling immediate revenue generation.

The renewable energy project in Albania and Kosovo is an attractive investment opportunity with a total capacity of 105 MW of photovoltaics and 99.5 MW of battery storage. With flexible pricing options and an excellent geographical location, it offers investors the chance to invest in the future of renewable energy.
