Περιγραφή:	

This high-performance rooftop system was commissioned in March 2019 and is located in the Salzland district. With a total output of 540.16 kWp and a specific yield of 986.55 kWh/kWp p.a., it achieves an annual electricity production of around 532,800 kWh. The system offers a stable earnings situation, attractive remuneration and high-quality technical components.

The remaining term of the EEG calculation period is 15 years (until 2039). The system is divided into 9 inverters, 4 of which have already been sold. The remaining system is now being offered at a price of EUR 1,120/kWp.
