ABOUT THE AREA

The community of Kapedes is located about 25 kilometers south of Nicosia, built at the foot of the Machairas Mountains. It is a semi-mountainous village with almost no plain, the extent of which is quite large. The landscape of the village is divided from the stream of Agios Onoufrios, the tributary of Pedieos, as well as from the tributaries of Gialia that cross the area.

Nicosia is a city that will reward visitors in search of 'something different'. As a result of the various architectural influences that are visible throughout the city, one cannot help but be charmed by the way past and present, traditional and contemporary have seamlessly fused together. The modern city centre will capture your imagination from the start, with its melting pot of influences that give the city a unique image. The city's landmarks, museums, theatres, musical events, and galleries both inspire and fascinate.

The streets of Makariou, Ledras, Onasagorou, Stassikratous and Mnasiadou offer shopping options that are comparable to many European countries. Nicosia also offers Cypriot and international culinary temptations in the many luxury restaurants that line its streets.
