Описание:

This attractive penthouse was built in 2018 and scores in addition to an unobstructed view of the grounds with an extravagant equipment that meets the highest demands. The apartment on the upper floor of the house has two separate house entrances, which you can access via the handmade steel stairs or the elevator built exclusively for this penthouse in custom design. The property is barrier-free accessible. As soon as you enter the penthouse, you will be greeted by the bright, light-flooded open living space design. The open hallway provides a smooth transition into the spacious living area, in the center of which is the fireplace, which impresses with its clear form and modern function. You can expect a high-quality and new fitted kitchen from Nolte, including a large side-by-side refrigerator as well as washing machine and dryer, which are separated in the adjoining utility room. In the back of the apartment there are three more rooms, as well as a bathroom and a half bath. The spacious bedroom has a separate dressing room. The high-quality bathroom is equipped with a floor-to-ceiling shower, a bathtub and double sinks. Highlight of the penthouse is the 40m² roof terrace, which will be your second living room on sunny days, as you can benefit from a covered area including radiant heaters and built-in awnings. You can easily store your barbecue and garden furniture in the adjoining, heated storage room. Merbau wooden parquet is laid throughout the apartment; the underfloor heating underlines the very pleasant room climate. The apartment includes an underground parking space, which is located directly at the house entrance exclusively available for this apartment, as well as two other outdoor parking spaces.
